Upotreba (slike)

Pravilna upotreba

- Pliers should be oiled regularly. A drop of oil at the hinge will lengthen the tool life and assure easy operation.
- When cutting wire with pliers, you should always wear glasses or goggles.
- Handles are provided for comfort. They are not intended to give user any degree of protection against electric shocks and should never be used on live electric circuits.

- Don't use pliers for cutting hardened wire, unless specifically manufactured for this purpose.
- Don't expose pliers to excessive heat. This may ruin the tool.
- Don't use pliers as a hammer.
- Don't hammer on the handles. They may crack or break.
- Don't extend the length of plier handles to secure greater leverage.
- Don't use pliers on nuts or bolts. A wrench will do a better job and with less risk of damage to the fastener.

Najčešće postavljana pitanja

Profil glave na vijku se do te mere deformisao da se ne može odvrtati odvijačem. Koji UNIOR alat se može koristiti u ovom slučaju?

Klešta za vijke 407/4DP su najbolji izbor za odvrtanje vijaka sa oštećenim profilom glave.
